Alyokhin S.A., Gritsyuk A.V, Krajushkin I.A.,
Zadrykin A.A., Borodin D.Yu. Application of glow plugs for simplification of starting of cold diesel engines
of 5TDF and 6TD types // Internal combustion
engines. – 2006. – 1. – P. 118-120.

Results of the research on application of glow
plugs for simplification of starting of cold diesel engines
of 5TDF and 6 D types are presented in the work. Results
of starting tests of diesel engines with glow plugs of
at ambient temperatures down to a minus 20 °C are presented.

Recommendations on places of installation of the
glow plugs in the cylinders of these engines are given..
