Klishin A.N. Heightening of operating performances of internal-combustion engine by usage of lubrications with ultra dispersible PTFE // Internal combustion engines. – 2006. – 1. – P.149-150.

The ultra dispersible polytetrafluoroethylene (PTFE) is applied as the component to engine oils. The engineering and ecological expediency of application of such lubrications is rotined at maintenance of internalcombustion engine. Bibliogr. 3 names.
