Klimov V.F., Volosnikov S.A., Bobrovskiy .I.,

Kuznetsov G.A. Using less known sources of current in system of electrical starting the engines of armored machines // Internal combustion engines. – 2006. – 1. – P. 121-125.

Considered is possibility of using the capacitive drives of energy for the realization of starting a tank engine.

Analyzed are the questions of possible variants of connecting the capacitive drives of energy with storage batteries in starting the engine. Considered modes of collaboration of batteries and capacitive drives of energy.
