Dyachenko V.G. External Combustion Engine – problems, perspectives / V.G. Dyachenko, O.I. Voronkov, O.U.

Linkov, I.M. Nikithenko // Internal Combustion Engines. –

2010. –№ 1. – P. 113-118.

Application external combustion engine as automobile motor, compressed air and traditional motor fuel as an energy sources reduces traditional motor fuel consumption on 60 – 70 percent. Practical application external combustion engines as automobile motor need expensive researches, organization of production light-weight gas-bags for pressure 30 – 50 MPa. Il. 5. Bibliogr. 3 names.
