Marchenko A.P. The department of ICE in the Kharkov:

the beginning / A.P. Marchenko, I.V. Parsadanov, V.A.

Pylev // Internal combustion engines. – 2011. – № 1. – P. 21-

25.

To solve the global task about creation of complex energetic object such as diesel, it is necessary to have specialists which would be in a deep understanding about processes related to the object of creation. This specialists are theorists, designers, production movers, technologists. The department of the Internal Combustion Engines at the Kharkov polytechnical institute was the pioneer and the leader of this process.

The history of this department establishment which is standing by origin of diesels building process is considered. II. 8
