Zajchkovsky V.N. The internal combustion engines production development at Kharkov steam locomotive plant

/ V.N. Zajchkovsky, A.V. Bistrenko, V.U. Kovalev // Internal combustion engines. – 2011. – № 1. – P.11-14.

Stages of the internal combustion engines production development at Kharkov steam locomotive plant are considered.

Comparison characteristics of the tractors and compressor engines produced at KPZ are resulted. The growth of a technical level ICE's production at KPZ was supported by highly professional heat engineers with the specialization of ICE. These engineers had been trained in the Kharkov technical institute (KTI), which was established in 1885 year.

Highly professional students from KTI lifted the production culture at the enterprise. Table. 3. Il. 3. Bibliogr. 2 names.
