Vasyliov I. P. Two destinies: Rudolf Diesel And Robert

Bosch / I. P. Vasyliov // Internal combustion engines. –

2011. – № 1. – P.87-91.

The main points of the biographies of the two historical personalities Rudolf Diesel and Robert Bosch are presented.

Their most important technological developments are discussed. Russia's role in the successful rise of these developments is made clear. Consideration is also given to the patent policy of two inventors when protecting their inventions.

Light is also cast on less well-known facts, such as the meeting of the two great men in Augsburg. Bibliogr. 8 names..
