AND
STATISTICAL PHYSICS**

QEDSP2006

September 19-23, Kharkov, Ukraine

2006

BOOK OF ABSTRACTS 2nd. International Conference on Quantum Electrodynamics and Statistical Physics (QEDSP2006), September 19-23, 2006, Kharkov, Ukraine. NSC KIPT, Kharkov, 2006, 212 p.

Abstracts of the talks presented to the 2^d International Conference "Quantum Electrodynamics and Statistical Physics" — QEDSP2006 (Sept. 19–23, 2006) deal with the up-to-date problems of quantum field theory and elementary particle theory, high-energy electrodynamics in matter, QED processes in strong fields, nonlinear dynamics, kinetic theory, phase transitions in condensed matter, and physics of quantum liquids. The 1st Conference (QEDSP2001) was held at the National Science Center "Kharkov Institute of Physics and Technology" (NSC KIPT), Kharkov, Ukraine in 2001. It has been dedicated to the memory of A.I. Akhiezer (1911–2000), outstanding physicist-theoretician, academician of NAS of Ukraine and the founder of the Institute for Theoretical Physics (ITP) at NSC KIPT, named after him.

КНИЖКА АБСТРАКТОВ 2-й Международной конференции "Квантовая электродинамика и статистическая физика" (QEDSP2006), 19–23 сентября, 2006, НИЦ ХФТИ, Харьков, 2006, 212 с.

Абстрактные доклады, представленные на 2-ю Международную конференцию "Квантовая электродинамика и статистическая физика" — QEDSP2006 (19–23 сентября, 2006), посвящены современным проблемам квантовой теории поля и теории элементарных частиц, электродинамике высоких энергий в веществе и квантово-электродинамическим процессам в сильных полях, нелинейной динамикой и кинетической теории, фазовым переходам в конденсированной среде и физике квантовых жидкостей. Первая такая конференция (QEDSP2001) проводилась в Национальном научном центре "Харьковский физико-технический институт" (НИЦ ХФТИ), в Харькове, Украина, в 2001 г. Эта конференция была посвящена памяти А.И. Ахиезера (1911–2000), выдающегося физика-теоретика, академика НАН Украины и основателя Института теоретической физики (ИТФ) в НИЦ ХФТИ, названного его именем.

Section A. Quantum field theory

Plenary presentations

| | |
|--|----|
| PLA1 Aspects of D-brane dynamics in supergravity backgrounds I.Bandos, <u>D.Sorokin</u> | 19 |
| PLA2 Vacuum condensates, dynamical masses, ether wind P.I.Fomin | 20 |
| PLA3 On BPS preons and M-theory I.A.Bandos, <u>J.A. de Azcárraga</u> | 20 |
| PLA4 The method of unitary clothing transformations in quantum field theory: the bound-state problem and the S-matrix A.Shebeko..... | 21 |

Oral presentations

| | |
|--|----|
| OA1 On (super)twistor string and its superspace(time) formulation <u>I.A.Bandos</u> , J.A.de Azcarrága, C.Miquel-España | 22 |
| OA2 Noncommutative geometry and Lorentz symmetry in supersymmetric spaces A.A.Zheltukhin | 23 |
| OA3 Magnetic monopole and CP violation at finite temperature <u>Yu.A.Sitenko</u> , A.V.Solovyov, N.D.Vlasii..... | 24 |

| | | |
|------|---|-----|
| PF5 | Hydrodynamic-type transport equation hierarchy for a fluid with a smooth central interparticle interaction <u>Y.A.Humenyuk</u> , M.V.Tokarchuk | 149 |
| PF6 | The possibility of registration of second sound waves in isotopic enriched diamond single crystal V.D.Khodusov, <u>D.M.Litvinenko</u> | 150 |
| PF7 | Universal behavior of thermal conductivity in a large vicinity of a critical point D.Yu.Ivanov | 151 |
| PF8 | Orientalional Brownian motion in macromolecular solutions under heterogeneous conditions <u>J.A.Kupriyanova</u> , A.V.Zatovsky | 152 |
| PF9 | Magnetoelastic coupling and magnons in the anisotropic half-metal A.B. Beznosov, E.S.Orel, <u>A.A.Loginov</u> | 153 |
| PF10 | Reduced description method in dynamic theory of particles interacting with medium <u>S.O.Nikolayenko</u> , Yu.V.Slyusarenko | 154 |
| PF11 | Statistical physics methods in economic theory: about the use of characteristic numbers of technological process in production systems classification O.M.Pignasty | 155 |
| PF12 | Description of diffusion process in disordered media by interface stochastic equation of motion <u>Z.Rezaee</u> , R.Torabi | 156 |
| PF13 | Correlation analysis of noise diagnostics of in-core reactor equipment V.A.Rudakov | 156 |
| PF14 | Kinetic theory of electromagnetic processes in medium A.I.Sokolovsky, <u>A.A.Stupka</u> | 157 |
| PF15 | Verification of the Bogolyubov functional hypothesis for an exact solvable model <u>A.I.Sokolovsky</u> , Z.Yu.Chelbaevsky | 158 |
| PF16 | Generalized phonon hydrodynamics <u>S.A.Sokolovsky</u> , I.M.Chernenko | 159 |
| PF17 | Temporal randomization to the interaction of normalized and anomalous transport A.A.Stanislavsky | 161 |
| PF18 | The theory of the dissipative structures of the defect kinetic system of a nonlinear physical system "metal+load+irradiation" <u>V.A.Tarasov</u> , T.L.Borikov, T.V.Kryzhanovskaja, S.A.Chernegenko, V.D.Rusov | 161 |
| PF19 | The thermal neutron waves excitation in multiplied media bounded by absorber <u>A.V.Vodyanitskii</u> , Yu.V.Slyusarenko | 162 |
| PF20 | On the kinetic theory of field transport by charged particles coherent distributions A.V.Vodyanitskii | 163 |

STATISTICAL PHYSICS METHODS
IN ECONOMIC THEORY:
ABOUT THE USE OF CHARACTERISTIC NUMBERS
OF TECHNOLOGICAL PROCESS
IN PRODUCTION SYSTEMS CLASSIFICATION

O.M. Pignasty

ISF "Technology", 10/12 Kotlov Str., Kharkov 61170, Ukraine,
e-mail:techpom@online.kharkov.ua.

Modeling of complicated economic systems is an effective way of their research. Functioning of modern manufacture looks like a complicated stochastic process, which is based on the general principles, applicable for thermodynamic systems and systems of economic exchange: Le Samuelson's, Carno-Khix' ones, etc. The state of manufacturing system is defined as the state of lots of base products, forming the system. The conduct of each of the base product is of probability character and can be defined by manufacturing factors. The state of lots of base products is described by distribution function with some moments, having manufacture interpretation: manufacturing margins and the rate of base products motion over production chain. The kinetic equation, taking into consideration technology of an article producing and performance attributes of equipment work, is defined for the system. For the first moments of distribution function the closed system of dynamic equations is obtained. With the help of statistical mechanics within the theory of disturbances for solution of the kinetic equation for manufacturing process the characteristic numbers of manufacturing system are input. The input numbers can be analogous to the Knudsen's and Strukhal's numbers, which are used in hydrodynamic problems. This approach gives a possibility realization of qualitative estimation of manufacturing process functioning, serious selection of correspondent system of macroscopic parameters balances equations for the real manufacturing process description, realization of classification of manufacturing systems. Estimation of the model selection should be interpreted as qualitative one, however, such an approach has the advantage, allowing to compare the results, corresponding to different models of manufacturing process, without any difficulties.
