

EUROINTEGRATION PLANE OF UKRAINE

Veresne Dr. Somosi Mariann

University of Miskolc, Hungary

For the successful forming of euro of integration strategy of Ukraine the use of analytical and expert potential of non-state organizations will not simply profit in the process of forming and realization of public policy in the field of European integration, namely such position, that will be based on a dialogue consensus of all 3 sectors (power, business, institutes of civil society) will allow to provide the adequate integrating and reaction societies on calls, that for him is carried by an euro integration.

For overcoming of defects in the mechanism of coordinating of technical help in the sphere of European integration, seems expedient in case of creation of general governmental-international analytically-consultative center of European integration in his composition to foresee the special structural subdivision of analysis of the systems, complex monitoring of international technical help and prognostication of corresponding necessities.

Present development of political dialogue between Ukraine and EU is based on introduction of strategy of integration Ukraine in EU, implementation parties working of Plan of actions within the framework of the European policy of neighborhood. Remaining out of limits of European Union, Ukraine is successfully associated with the process of realization of the general European policy of safety and defensive. EU acknowledges the important role of Ukraine in maintenance of safety and stability on a continent, and also her high industrially-technological potential in a military sphere that is confirmed by practice of invitation of Ukraine to realization of soldiery maneuvers with participation of subdivisions of EU.

At the same time, today EU officially did not define the possible term of receipt of membership for Ukraine, it is though planned that with Ukraine a deep agreement, that, maybe, will foresee the prospect of membership in EU, will be celled. Implementation of certain criteria will be preceded it Ukraine: first of all, Copenhagen criteria, and also those that is certain directly for Ukraine. Pre-condition will be successful implementation of Agreement about partnership and collaboration. Thus, for today the question of prospect of integration of Ukraine in European Union remains difficult and contradictory. However, today, without regard to that the prospect of membership in EU seems unattainable even if Ukraine will work out main problems and will execute all requirements of EU in relation to membership, so as be not guarantee of her entering into EU. But the task of European integration of Ukraine, first of all, consists in quality changes as in a legislation, to the system of standardization, organization of co-ordination of activity of organs of power up to the improvement of welfare of ordinary Ukrainian.
