

PROFESSIONAL COMPETENCIES LEVELING APPROACHES OF ACADEMIC REFUGEES AS TECHNICAL SPECIALTIES TRAINEE

Tetyana Neroda

Ukrainian Academy of Printing, Lviv

Educational process intensification under the academic mobility program has always caused difficulties due to partial lack of professional competencies provided for by educational standard, work up a number of emotional complications associated with cultural sensitivity and danger in underestimating trainee's self-esteem, the need for prompt establishment of interdisciplinary links, etc. This problem became especially popular after the open Russian aggression in 2014 and the subsequent sharp escalation in February 2022 and, finally, a full-scale swoop of the territory of our state. The invasion summoned the largest refugee crisis in Europe since WW2, as more than eight million Ukrainians left their homeland, and about a third of the population falls under the category of internally displaced persons [1]. Taking into high national indicators account of youth enrollment in higher education, one can come to conclusion about academic refugees' significant number.

An obvious means of solving possible challenges is flexible mechanism of the **educational trajectory**, which allowed immigrant students to fully study under the academic mobility program at the Ukrainian Academy of Printing in accredited specialties [2]. At the same time, the student's *experience* in chosen field of knowledge and previously accumulated ECTS *credits* are taken into account. The *educational*

standard is a rules and strategies set that determine the conditions for *curriculum* mastering. Accordingly, proposed strategies of higher education institution do not change during learning process, but only regulate its course. In mentioned *curriculum* addition, the *informal* and

dual education results are intended to learning process strengthen, in particular, of Industry 4.0 principles and models included, as well as an adequate structure of *interdisciplinary links*.

Thus, defined tasks categories arranged in given diagram fully ensure the professional competencies leveling for academic refugees as technical specialties trainee and for other participants of academic mobility program. This state of affairs makes it possible to provide optimal options for establishing an individual rhythm, taking into account one's own peaks of activity and, as a result, to grasp the offered intellectual resources of the chosen educational and professional program in the profiled field of knowledge.
