

National Technical University «Kharkiv Polytechnic Institute»

ELECTRIC MACHINE INDUSTRY FACULTY

«Computer and Radioelectronic Systems Of Testing and Diagnostics»

Specialization:

«Computer and Radioelectronic Systems of Testing and Diagnostics»

Speciality: 152 - Metrology and measurement information equipment

Branch of knowledge: 15 - Automatization and device building

Quality assurance

Metrology

Ecological monitoring

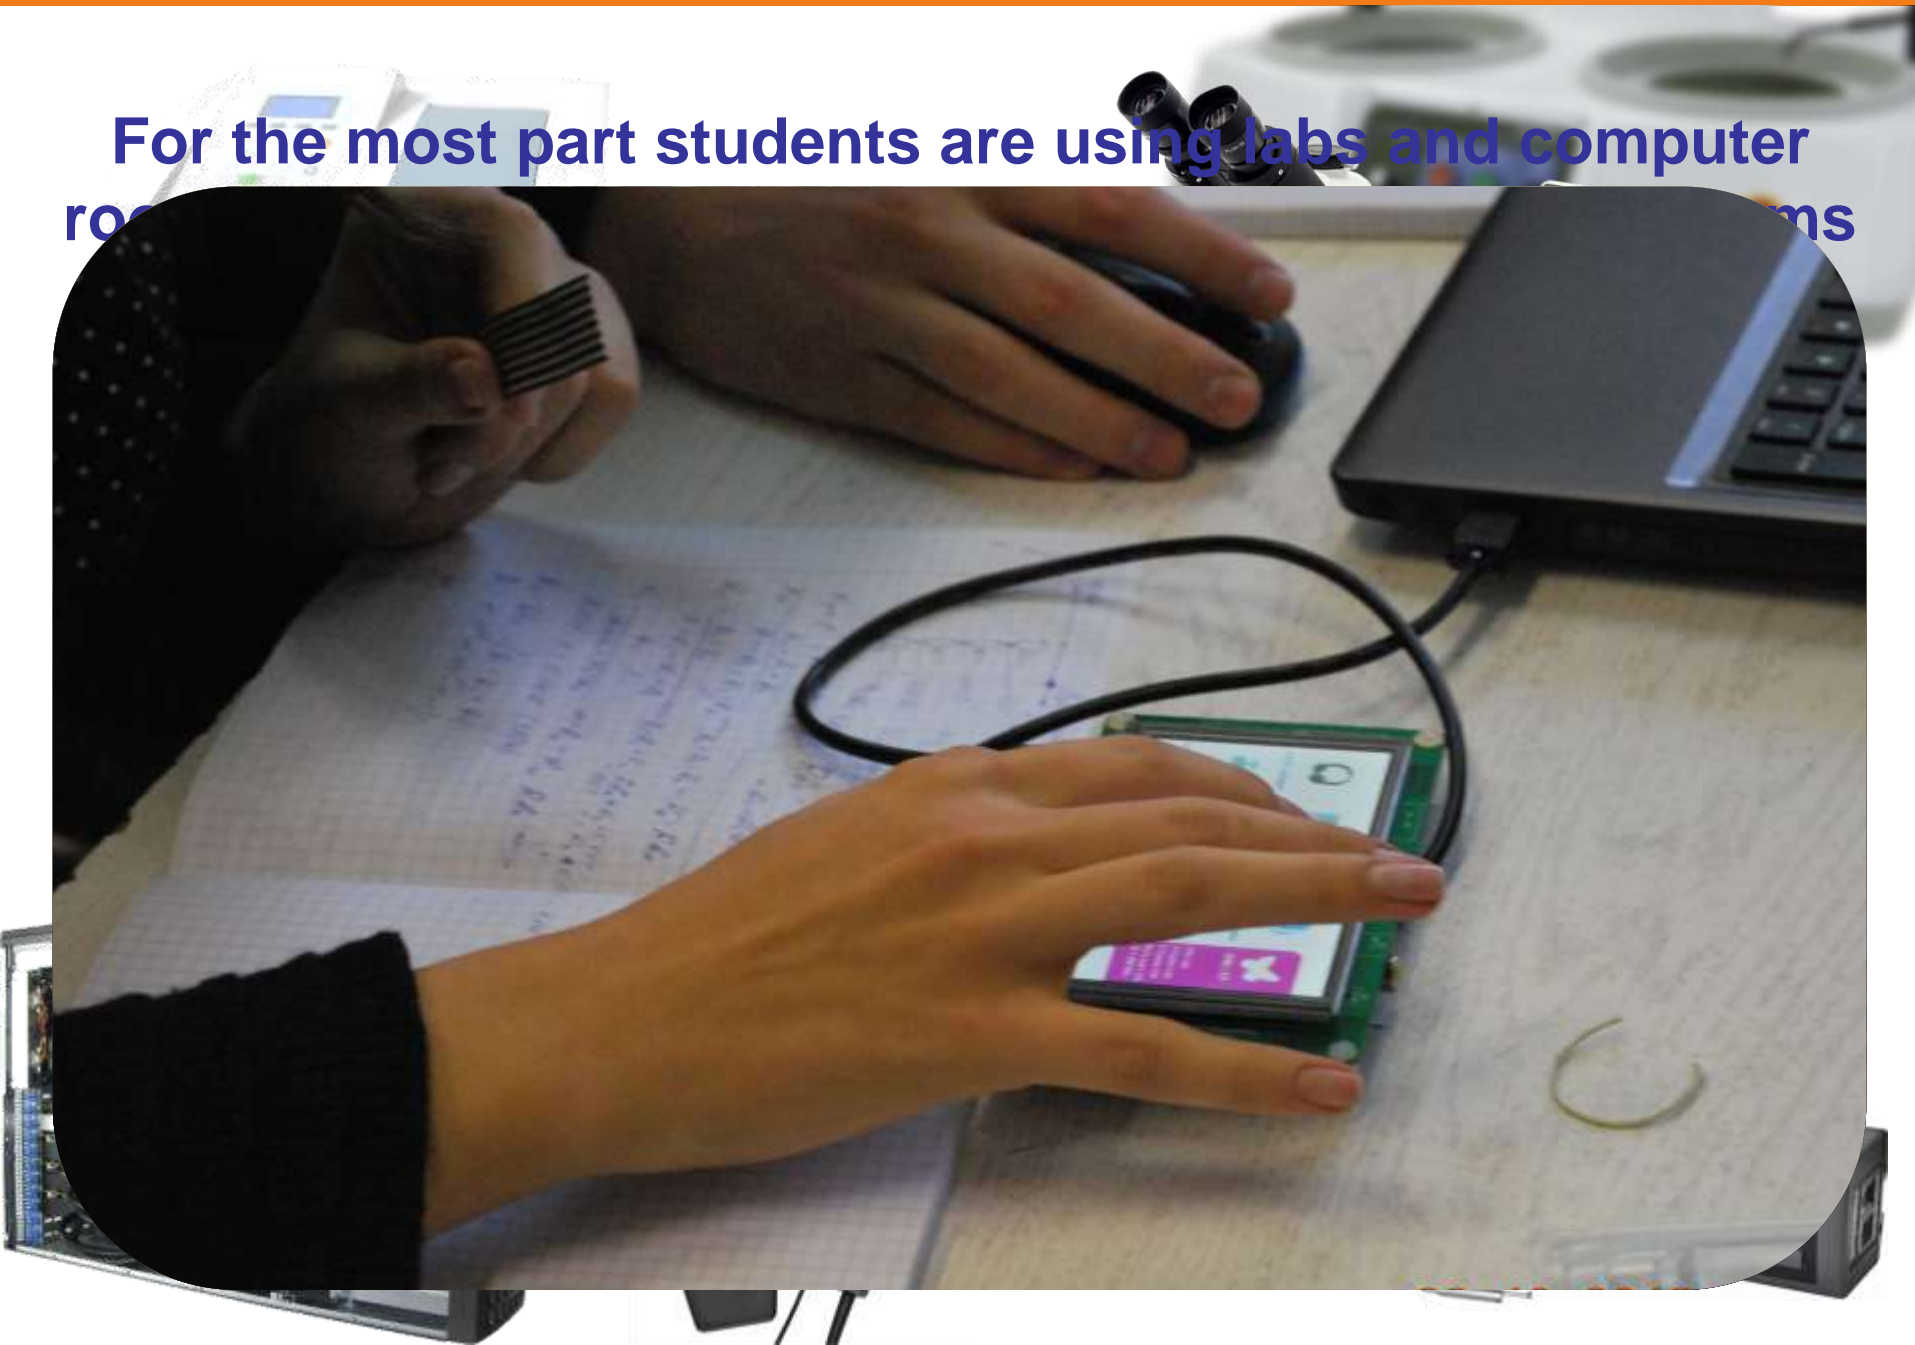

**The students are gaining their education
in NTU 'KhPI' buildings within park zone
in historical part of Kharkiv city**

Lectures on basic and special subjects are performed in spacious auditoriums with European-level multimedia equipment

For the most part students are using labs and computer rooms

NTU "KhPI" Scientific Library

- **1,500,000 books**
- **Foreign and local scientific and technical literature**
- **Computerized reading halls**

European standards of High Education

Our approach to high education is based on European practices and allows our students to:

- proceed with foreign practice*
- receive internationally acclaimed Diploma*
- further the education in foreign Universities*
- get the favourite job*

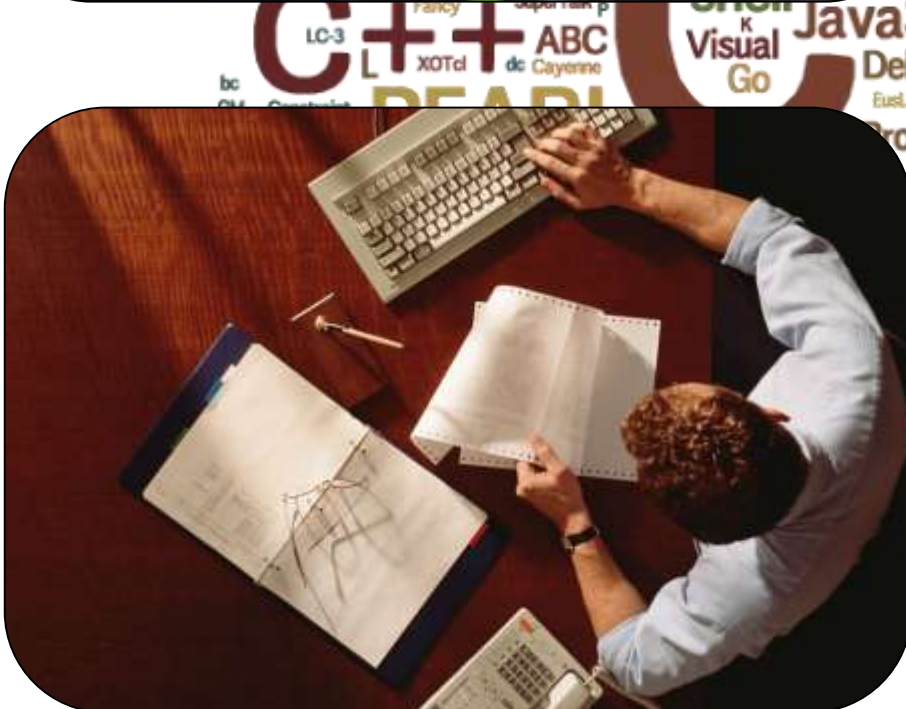

European standards of High Education

Directly at the “Computer and Radioelectronic Systems of Testing and Diagnostics” department you are getting Bachelor’s and Master’s degree, and the possibility to proceed for Ph.D and Doctor of Science degree is open as well
