Our teachers

Varavina Elena Pavlovna
Deputy Head of the
Department, Associate
Professor

Department provides a high level of training through the use of full-time teachers and teachers who work part-time. The staff contains two professors, nine associate professors, ten senior teachers and two assistant teachers.

Practical Trainings

Students of senior courses have the opportunity to undergo practical training at the training center "Shebelinkagasvydobuvannya", which is located in the Kharkiv region. The training consists of two parts: theoretical and practical. The practical part takes place directly at the gas producing fields. After the training course students receive a certificate of chosen speciality "Drilling assistant", "Operator of oil and gas production" and others.
